

Don't Let Snow, Cold and Ice

Trip Up Your Tractor

NDSU Extension/
Agricultural & Biosystems Engineering
NDSU Ag Communication

Slow down	Add ballast to compensate for front-end loaders
Allow more stopping distance	Remember that reaction times are slowed by poor visibility and cold
Wear close-fitting clothes that allow for freedom of movement and visibility	Don't warm up tractors in enclosed buildings
Use grapple jaws to move large round bales	Set realistic goals and plan ahead
