

Vehicles Available for Use in North Dakota: 2000

The proportion of North Dakota households with multiple vehicles has risen dramatically over the past 40 years. In 1960, less than one in four households in the state had more than one vehicle available for use. According to the 2000 Census, nearly two out of three households have multiple vehicles. Most of the change took place during the 70s. Over the last 10 years (between 1990 and 2000), the average number of vehicles available for use remained relatively unchanged at nearly two per household.

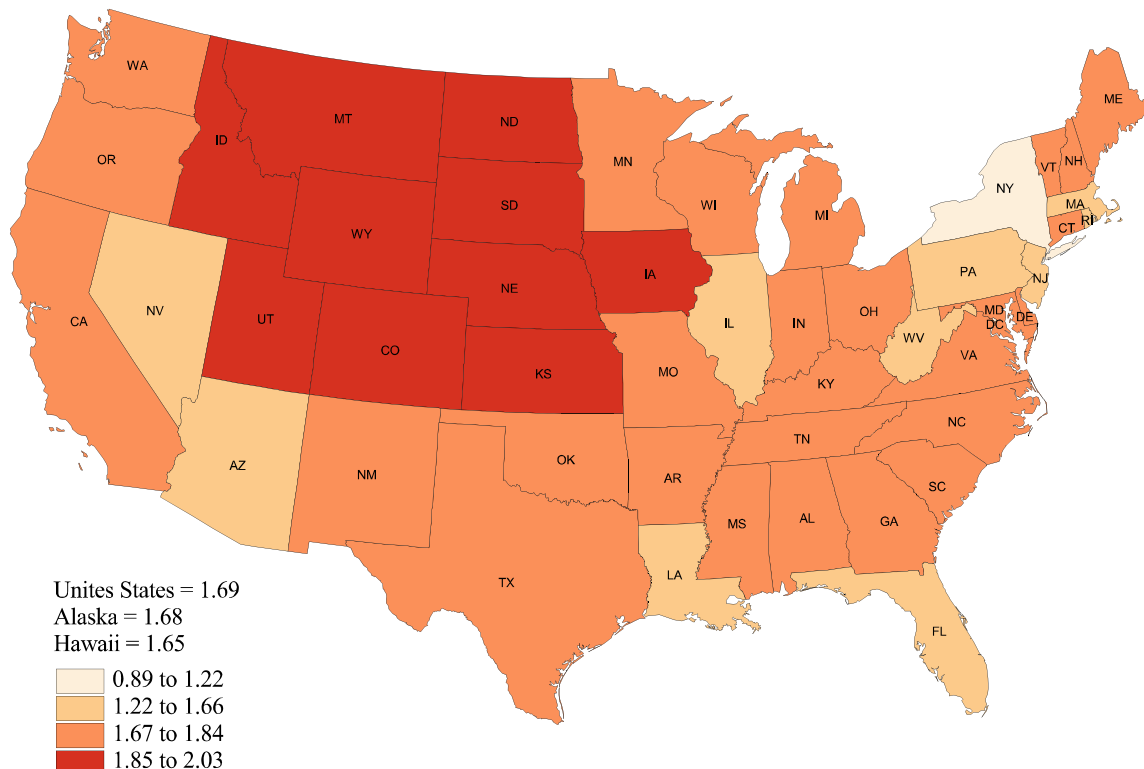

The data on available vehicles show the number of households with a specified number of passenger cars, vans, and pickup or panel trucks of one-ton capacity or less kept at home and available for use of household members. Vehicles rented or leased for one month or more, company vehicles, and police and government vehicles are included if kept at home and used for nonbusiness purposes. Dismantled or immobile vehicles are excluded. Vehicles kept at home but used only for business purposes also are excluded. The statistics do not measure the number of vehicles privately owned or the number of households owning vehicles.

Occupied Households by Number of Vehicles Available
North Dakota: 1960 to 2000

Average Number of Vehicles Available for Use Per Household by State: 2000
