

Total Housing Units in North Dakota: 1940 to 2000 Census and July 1, 2000 to 2002 Estimates

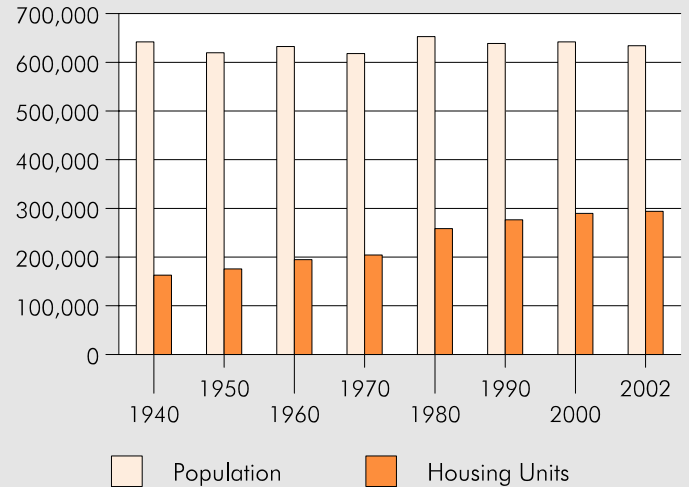

Though North Dakota's population has remained relatively stable since 1940, housing units have grown substantially (Figure 1). In 1940, housing units totaled 162,881 statewide, compared to 289,677 in 2000. This represents a 78 percent increase over this 6-decade period. Current 2002 estimates suggest an additional 1.5 percent growth during the 2000-2002 period (Table 1). Much of this growth may be attributed to an increase in single-person households. In 1940, only 7.9 percent of housing units were occupied by one person compared to 29.3 percent in 2000.

Growth in North Dakota housing has been largely concentrated in the larger metropolitan areas throughout the state. Approximately 50 percent of all housing growth between 1940 and 2000 took place in Cass and Burleigh counties (Table 1). The 2002 estimates indicate this trend is continuing.

A housing unit, as defined by the U.S. Census Bureau, may be a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or, if vacant, is intended for occupancy) as separate living quarters.
