

Housing Units Authorized for Construction by Building Permits in North Dakota: 2004

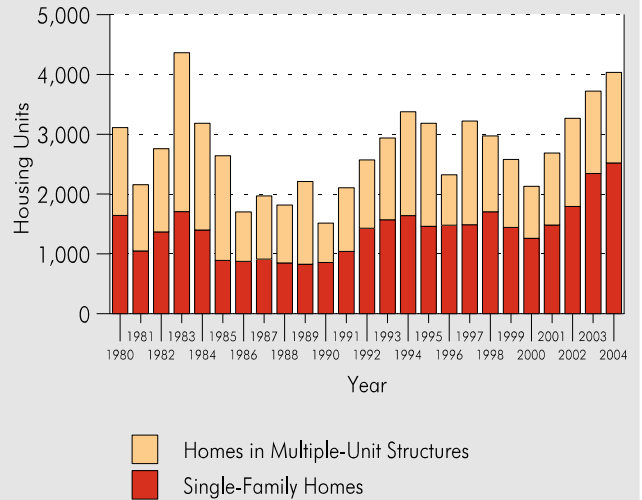

New homes authorized for construction by building permits in North Dakota increased 8.4 percent during the past year, from 3,721 housing units in 2003 to 4,033 in 2004. Total construction value for these units increased 9.3 percent to \$434.4 million in 2004, up from \$397.5 million in 2003 (Table 1).

North Dakota saw an increase in permits for single-family as well as multiple-family housing between 2003 and 2004. Single-family homes authorized for construction grew 7.6 percent between 2003 and 2004 in North Dakota. At the same time, homes in multiple-unit structures authorized for construction increased 9.8 percent.

In 2004, single-family homes comprised nearly two-thirds of new authorized housing in North Dakota (62.5 percent). This proportion is relatively unchanged from 2003. The construction value per single-family home in North Dakota averaged \$135,881 in 2004. Nationally, the value averaged \$158,364 (Figure 2).

Together, Florida, California, and Texas continue to capture approximately one-third of all new housing units authorized for construction in the United States (31.5 percent in 2004).
